

It's all about
looking good
and feeling great

Restylane[®]
NATURAL BEAUTY MADE IN SWEDEN

We all know that healthy, toned skin, free from niggling lines and imperfections, is key to looking our very best – whatever our age! And of course: the better we look, the better we feel.

But maintaining this vitality becomes more of a challenge as we grow older. So if creams are no longer living up to their promise and surgery seems like a step too far, RESTYLANE® could be the ideal treatment for you. Looking your best for the age you are is easily achieved with RESTYLANE.

RESTYLANE for a visible difference

Whether you would like to smooth out the signs of ageing; create fuller, more sensuous lips; or rediscover your cheekbones or jaw line to improve the profile of your face, there is a perfect RESTYLANE treatment for you. And RESTYLANE is not just for your face – it can also be used to rejuvenate your neck, décolletage and backs of hands, helping you to refresh your overall appearance.

RESTYLANE gets to the heart of the problem of facial ageing.

Youthful skin is rich in hyaluronic acid (HA): a substance that binds water, hydrates the skin, and promotes all-important softness and fullness. But as we age, the HA in our skin gradually becomes less efficient. Inevitably, this leads to loss of facial fullness and the tell-tale signs of ageing.

RESTYLANE for revitalised looks

RESTYLANE is an injectable treatment that contains hyaluron gel. It is specifically formulated to delay the signs of ageing and refresh looks in a natural and subtle way. When injected into the skin, RESTYLANE effectively gives our own HA a helping hand, instantly boosting the skin's hydration system to restore volume and lift the skin to smooth away and soften the appearance of facial lines.

RESTYLANE has the additional advantages of stimulating collagen production¹ and improving skin elasticity.² The results of RESTYLANE treatment are clearly visible – healthier, smoother, toned skin with an overall revitalised appearance.

RESTYLANE is instant and long lasting

RESTYLANE treatment usually takes no more than 30 minutes, so can be easily fitted around your other commitments. You can see the results instantly. It's long lasting too: for up to 6 to 9 months in lips and around a year in other facial areas. And best of all, because it's not permanent you can remain in control of your looks in the months and years ahead.

RESTYLANE is reassuringly safe

RESTYLANE has been proven with more than 10 years of experience to be effective, long lasting and safe, with over 6 million treatments worldwide as further testimony. The unique and patented NASHA™* gel from which RESTYLANE is made closely resembles the natural HA found in our skin. This not only ensures the prolonged duration of treatment results but also minimises the risk for inflammatory reactions. If the gel is not NASHA, it is not RESTYLANE. When discussing treatment choices with your cosmetic practitioner, you need to ask for RESTYLANE by name.

See for yourself the difference RESTYLANE makes

There are many different ways to enhance your looks, but none come close to RESTYLANE for safety, versatility and outstanding natural effect.

The most obvious difference with RESTYLANE can be seen from before and after photographs, where the subtle, natural shifts in appearance say more than words ever can...
