Revitalisation Implant

Time marches on but
beauty stands still.

Introducing a revolution
in skin rejuvenation

A close-up photograph of a woman with blonde hair, smiling broadly. Her eyes are bright and looking slightly to the right. The lighting is soft and natural, highlighting her skin texture and the texture of her hair. The background is a plain, light color.

Pure beauty... naturally

RevanessePure

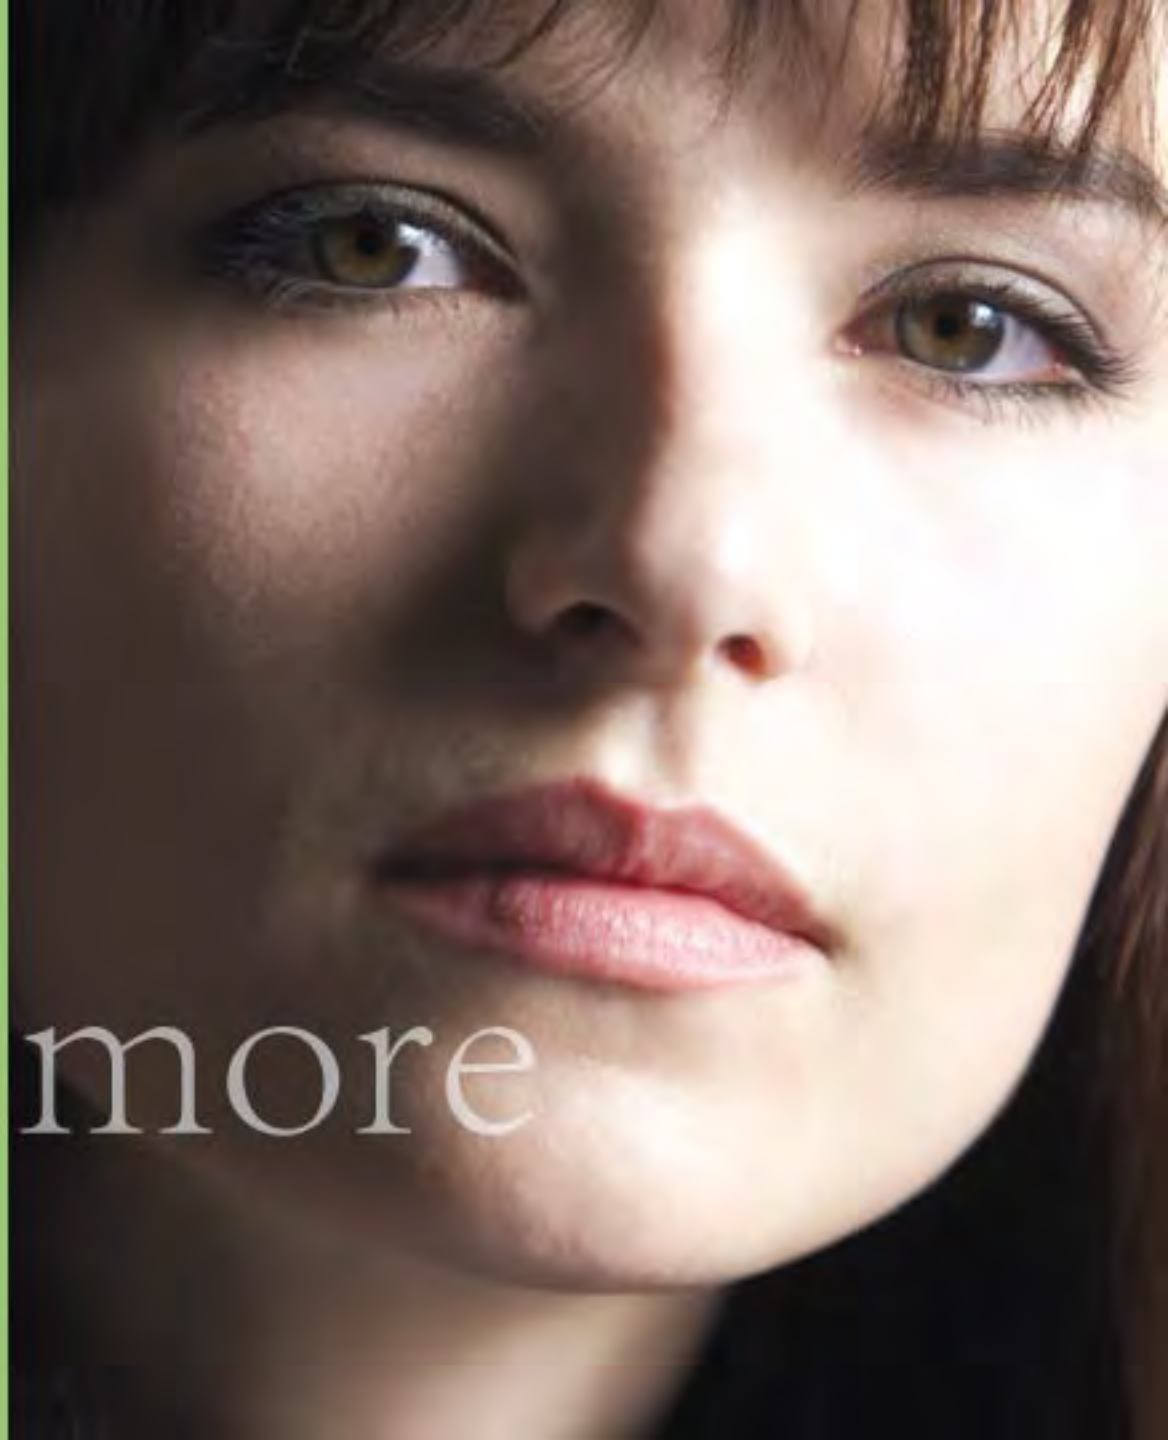

REVANESSE.COM

Our skin plays a vital role in our health and well-being, and hyaluronic acid is vital to our skin. This naturally occurring substance binds water, thereby hydrating the skin and keeping it fresh, firm and healthy.

With age, your body decreases its production of hyaluronic acid, leading to the skin's loss of elasticity and vitality. Revanesse Pure® acts to restore your skin to a more youthful state by regenerating this lost hyaluronic acid.

Results that do
than just touch the surface

more

A close-up, high-resolution portrait of a woman's face, focusing on her eyes and skin texture. She has light brown eyes and a neutral expression. The lighting is soft, highlighting the natural texture and tone of her skin. The background is dark and out of focus.

Revanesse Pure® is Ideal for:

- supplementing lost hyaluronic acid in the skin (face, neck and hands)
- increasing the skins elasticity
- improving the skins hydration
- giving skin a fresh appearance and a natural *'Lifting Effect'*

Areas of application:

- Face
- Throat
- Lower neck line
- Dorsal surface (back) of the hands

A revitalizing treatment...

Revanesse Pure® is implanted into the superficial dermal tissue as a supplement to the intercellular matrix and the intra-dermal tissue in order to restore lost skin structure. Its mode of action is based upon the latest bio-technology in the manufacturing of injectable hyaluronic acid.

When injected superficially (mesoderm layer), Revanesse Pure® firms the skin by forming a supportive network that creates a moisturized, fresh, healthy and younger look. Revanesse Pure® is as safe and easy to administer as the other products in the Revanesse® family, and can be used in conjunction with any of them. This innovative treatment marks the beginning of a new era in skin care. Treatments typically take 15-20 minutes, and are repeated on a monthly basis for four consecutive months.

A close-up photograph of a woman's face, focusing on her eyes and hair. Her hair is dark and appears to be blowing in the wind, partially obscuring her face. The text 'smoother skin' is overlaid in white, with 'smoother' in a smaller font above 'skin' which is in a larger, serif font.

Finally a product that addresses the root
cause of aging - not just the symptoms

Q. How is Revanesse Pure different?

A. Revanesse Pure® (non-cross linked hyaluronic acid) is absorbed quickly by the skin. It does not act like traditional fillers that fill in individual creases or wrinkles but rather helps to nourish and moisturize the entire surface of the face. By using Revanesse Pure®, the skin will naturally begin to look healthier and more youthful. Revanesse Pure® will help feed your skin the vital moisture that it needs after years of abuse from the elements. The product contains 100% pure non cross linked HA from non-animal sources.

Q. How many treatments will I need?

A. Because Revanesse pure® is not a filler, the mechanism of action is different. In order to see results you will need a planned schedule of treatments. The results will be seen after a few treatments. Your doctor will discuss with you what type of treatment plan you will need depending on the condition of your skin and your age. Usually, about 4 treatments are needed spaced about 4 weeks apart.

Q. How long will the effects last?

A. Because Revanesse pure® is actually helping repair your skin the results are long lasting. It will, however, not stop the aging process, so additional treatments at a later time may be necessary to maintain its effects. It is generally recommended that once the first course of treatments is administered the patient should return 8-12 months later for follow up visits that will further enhance the elasticity, texture and appearance of the skin. Follow ups will require less treatments, as the skin will be in a better condition than it was prior to treatment with Revanesse Pure®.

Q. Where can I use it?

A. Revanesse Pure® can be used on the face, neck, hands and chest area. Many times, the sun is the primary cause of aged skin because it causes the skin to lose its vitality, develop fine lines and form a dry withered look. Revanesse Pure® will work on all areas where this type of problem exists and great results have been seen on these areas.

Revanesse Pure® is a colourless, odourless, transparent, liquid like solution comprised of water with 14mg of pure hyaluronic acid. Because it does not contain any human or animal products, chances of allergic reactions are extremely rare. Revanesse Pure® will be absorbed quickly by the skin, giving you a natural and fresh look without feeling like there is anything in your face.

Safe, gentle,
long lasting results

What else is hyaluronic acid used for?

Hyaluronic acid is a naturally occurring acid found in the skin, and is the key component of the extracellular matrix. HA is hygroscopic (water-holding) and viscoelastic (lubricating). Two properties that allow it to give the skin the degree of hydration it needs. Over time skin loses its natural abundance of hyaluronic acid, which leads to epidermal sagging and the appearance of wrinkles.

Currently, hyaluronic acid is taken as an over the counter supplement for natural lubrication of joints and skin. It is also found in many skin care lotions as it is known for its moisturizing and anti-aging properties.

What can non-cross linked HA do for you?

- Prevent wrinkles
- Improve the elasticity and hydration of the face, neck and chest area and the back of the hands.
- A natural treatment that revitalizes and rejuvenates the skin

Get on with your daily activities
with minimal down time

Effectiveness

The benefits of Revanesse Pure® are long lasting however, the treatment can be repeated as often as you feel necessary, ensuring that you always look and feel your best.

Revanesse Pure® (non-cross linked hyaluronic acid) is absorbed quickly by the skin. It does not act like traditional fillers that fill in individual creases or wrinkles, but rather helps to nourish and moisturize the entire surface of the face. Non-cross linked HA targets the root cause of wrinkles helping to bring the skin back to a healthy and nourished state. This in turn improves the skin's elasticity, texture and appearance.

Think of it as an essential part of your skin care program!
